well experienced operators are in our list.

Yala National Park

Yala National Park is well recognized as one of the best parks in the world to observe and photograph leopards. Sri Lanka having been ranked 21st among the large biodiversity hotspots in the world, eco-tourism in the island has pushed Yala Park to forefront of numerous wildlife reserves of the island. Although Yala is the best park in Sri Lanka for spotting mammals .The best period to see the animals is during the January to May dry season, when animals cluster around water sources in multi-species groups. It is possible to take full day jeep safaris or to split your day into morning and afternoon drives. Your best chance to see a leopard is generally early in the morning and then again at dusk. It will take a drive approximately 3 hours from RV. The tours could be arranged accordingly to suit your time best for this purpose.

Udawalawe National Park

Uda Walawe national park in Sri Lanka is next best to see many animals, especially elephants in their natural habitat. This Park is second in popularity only to Yala National Park

in the Southern Region. A world famous place with a heavy elephant population numbering to more than 500 or more. In this park one can observe elephants at any given time of the day. Other than Elephants, water buffalo, spotted & barking deer, wild pig, sambhur, jackal, Elk, grey & striped necked mongoose are also found in this park. Though the leopard, jungle & fishing cats were recorded in the park, sightings are very rare.

Kumana National Park

Kumana National Park is a well-known eco tourism attraction and bird sanctuary where a multitude of birds breed and nest. Kumana Villu a is prominent place here where many water birds could be sighted such as pelicans, painted storks, spoonbills, white ibis, herons, egrets and little cormorants.

Some very rare birds such as black-necked stork and crowned cranes too had been sighted around here occasionally apart from bird watching many types of mammals too could be encountered here without much differently. The location could be reached within 3 hours from RV.

Sinharaja Rain Forest

This rainforests of Sri Lanka are one of the world a high bio-diversity hot spots. They make Sri Lanka one of the richest countries in the world for vertebrate diversity, per square kilometer. We offer a rare opportunity to explore Singharaja one of the last untouched tropical rain forests in the world, with it's extraordinary flora and fauna, recently declared a World Heritage Site. More than 60 percent of its trees are endemic and many of them are considered rare. There is also much endemic wildlife in the forest, especially birds, mammals, and butterflies, as well as many kinds of insects, reptiles, and rare amphibians. Remember to take your trekking shoes, a raincoat and enough time to explore the tropical jungle where the rainfall is very high. Among the numerous extraordinary plants, you will find Orchids growing wild.

Watch out for the carnivorous plants like Bandura Pitcher Plant or the Nepenthes Variety of the plant is found in some locations. The insets that approach this flower to nectar are trapped inside the wax fluid and digested to be converted to nutrients to the plant. The things needed for the expedition are trekking shoes soaps for leeches a raincoat. This location is about 4 hours journey from RV.
